

Conqueror's Insta-Awn offers the fastest set-up time with minimal effort. Utilising a uniquely designed frame with integrated drop-down legs, the awning sets up in just a few minutes. It's design does not require any additional support poles and is manufactured using the highest quality materials that will endure the harshest conditions. The awning can be fully inclosed with sides panels that attaches with velcro.

The new double fold, high volume roof design on the CompanionX gives one the feeling of a large interior space, while the unique design helps funneling hot air out of the caravan. This makes for a more spacious and cooler caravan.
